

CHAPTER 5

CONCLUSION AND FUTURE ENHANCEMENTS

Fund raising is a very essential topic because we need to raise awareness in people about the troubles that our society is facing and to improve the condition of millions of people who are poverty stricken. Sometimes, moral support also required because money is not everything. There are millions who still don't have access to three meals a day. This project is an attempt to raise awareness amongst all of us to contribute towards the ones in need.

This project is meant only for the College level purpose (for now) because the youth must be change they wish to see in the world. Unlike other websites, we have decided to add another dimension to the donation system by including an option to donate stock items because of the latency of money being misused in this society.

5.1 Future Scope

In the current world the area that's lacking implementation is the donor stock. The general opinion is that charity means only money but donating daily items of necessity in the hour of need is more important.

It aims on specifying the donor recipient's details so that the donor can be assured about the cause and the conditions of requirement he/she is donating to. Another aspect of the project that is essential is trust. Different individuals have different donation interests and their cause of donations is related to their personal reasons and hence, this project focuses on categorizing the charity individuals in order to make it easier for the donor to donate.
