

ABSTRACT

Fund Raising Database Management is a project which aims in developing a computerized system for gathering voluntary contributions of money or other resources, by requesting donations from individuals, businesses, charitable foundations, or governmental agencies.

This application is easy to use for both beginners and advanced users. It features familiar and well-thought-out attractive user interface, combined with strong searching, insertion and reporting capabilities. The report generation facility of Fund-Raising System helps to get a good idea of individuals who have donated for different charities.

A new dimension has been added towards charity by providing a choice to donate either money or any stock items. This database is meant for College level fund raising and hence focuses mainly on the contributions made by Students and College Staff. Today's youth are the future of tomorrow and this is one of the reasons why the youth should be the backbone of such fundraising events. An option has been included to donate to various categories based on types of Causes supported. Overall this project has been developed to help people in need in the best way possible and also reduce the human efforts.

ACKNOWLEDGMENT

The fulfillment and rapture that go with the fruitful finishing of any assignment would be inadequate without the specifying the people who made it conceivable, whose steady direction and support delegated the endeavors with success.

We would like to profoundly thank **Management of RNS Institute of Technology** for providing such a healthy environment to carry out this Project work.

We would like to thank our beloved Director, **Dr. H N Shivashankar** for his confidence feeling words and support for providing facilities throughout the course.

We would like to express my thanks to our Principal, **Dr. M K Venkatesha** for his support and inspired me towards the attainment of knowledge.

We wish to place on record my words of gratitude to **Dr. M V Sudhamani**, Professor and Head of the Department, Information Science and Engineering, for being the enzyme and master mind behind my Project work.

We would like to express my profound and cordial gratitude to my Lab In-charge **Mr.R Rajkumar**, Assistant Professor, Department of Information Science and Engineering for their valuable guidance, constructive comments and continuous encouragement throughout the Project work.

We would like to express my profound and cordial gratitude to my Faculty Incharge **Mrs Kusuma R**, Assistant Professor, Department of Information Science and Engineering for his/her valuable guidance in preparing Project report.

We would like to thank all other teaching and non-teaching staff of Information Science & Engineering who have directly or indirectly helped me to carry out the project work.

And lastly, We would hereby acknowledge and thank my parents who have been a source of inspiration and also instrumental in carrying out this Project work.
